

Welcome to this new look edition of SentineX News, which contains information about our SentineX products, our staff and our valued customers. Send your feedback or photos to [dianne.hoskins@novecom.com.au](mailto:dianne.hoskins@novecom.com.au)

## Innovation Update

Sheldon Maurer is a qualified electrical engineer and IT professional with expertise in software design, development and implementation. Recently, he developed the SentineX weather station software.

Sheldon Maurer

This customisation also enables us to incorporate other sensors into the SentineX platform, including flow, pressure, level etc, providing flexibility that was previously constrained by the use of pre-packaged data logging systems and proprietary programs.

Our innovation and customised design allows us to modify, adapt or combine any SentineX product. Our private wireless network ensures real time data is available at the customer's fingertips, so they can implement actions to mitigate potential impacts.

## 60 seconds with...

Name : Kieren Bennetts  
Site : Wilpinjong Coal

SentineX Customer since: 2007

Favourite Holiday Location: anywhere near a beach

Favourite Movie: The Hangover

Favourite Food: Thai

Favourite Car: F-truck, but only with a fuel card

Favourite SentineX Feature: the system is easy enough to operate that others on site can use it

Favourite SentineX Experience: anytime I can prove compliance

## 2011 Software Release

The latest version of the SentineX software **2011** has just been released, providing an improved Repository interface and improved reporting. For example, the directional noise algorithm has been refined to optimise the frequency filter.

### New Features also include:

- self data auditing
- daily met reporting
- daily met inversion reports
- dust contribution report
- annual average dust report

To enquire about an upgrade, contact [jeremy.pola@novecom.com.au](mailto:jeremy.pola@novecom.com.au)

## did you know?

You can use the Complaint command via the Repository to request a batch of statistics and an audio file for any complaint. The command will provide the data from 2 hours before and 1 hour after the specified complaint time.

## Photo of the Month

One of the first installations of QuattroSound® — the latest in directional noise monitoring.

Taken by **Conrad Neilands** (Novecom) at **Glendell Mine**.

## Coming up in our Next Edition

- ◆ Innovation Update
- ◆ SentineX installations - expanding geographic boundaries
- ◆ Introducing ... Nathan Ott – field technician

## Introducing.... JIM DOONER - Maintenance Coordinator

Jim is experienced in providing maintenance planning support and is responsible for planning and scheduling the preventative maintenance programs for SentineX units. Jim can be contacted on 02 4001 0182 or via email [jim.dooner@novecom.com.au](mailto:jim.dooner@novecom.com.au) to answer and respond to your questions.

### 60 seconds with Jim...

Favourite Holiday Location: Friend's 50 acre farm at Scone

Favourite Movie: The Blues Brothers Favourite Car: 1962 XL Falcon

Favourite Food: McDonalds (especially when I'm hungry)

SentineX Feature: it's a unique product

SentineX Experience: installing SentineX units for the Xstrata project
