

New Faces of Novecom

Following the recent relocation to larger premises, Novecom has established and appointed nine positions. The Novecom team will continue to develop the SentineX technology as well as maintain and grow Novecom's range of products and services.

In addition to the existing data acquisition and reporting solutions offered through the SentineX platform, our team can provide business solutions for the following:

- Complex systems integration
- Web application development
- Lotus Notes development
- Database development
- Server and network design and administration
- Criteria® risk management software.

The new faces of Novecom are : Manager - Jeremy Pola; Lead Analyst/ Developer - Darren Hennessy; Analysts/Developers - Sheldon Maurer, Peter Hennessy & Ben Wall, supported by IT Technician - Jonathon Warner; R&D Technician - Conrad Neilands; Technician - Nathan Ott and Maintenance Planner - Jim Dooner.

The Novecom Team

Conference Update.... Jeremy Pola recently attended the NSW Minerals Council Environment and Community Conference in Wollongong, where John Watson from Xstrata Coal NSW discussed and shared with delegates the benefits of continuous environmental monitoring systems. Please contact Jeremy Pola if you would like any further information.

SX New Trailer Design

Leveraging resources from member companies within The Advitech Group has resulted in a new trailer design for our SentineX Noise units.

Novecom combined the detailed design skills of Advitech's draftsmen to design a trailer that utilised all off cuts, resulting in zero waste. We were also able to utilise the manufacturing capabilities at Hushpak to trial the new design for our SentineX monitoring units.

This new design reduced waste and rework that was generated with the previous designs, reducing time to manufacture and assemble.

If you would like a mobile SentineX Noise system, or like your permanent noise system to be more mobile, we can reinstall the hardware onto a trailer, giving you greater flexibility and mobility. For further information on our trailer mounted systems, please contact Jeremy Pola.

SentineX Trailer Unit

Welcome to The Link Newsletter. In this edition, we introduce you to the nine new faces of Novecom, plus share our lean manufacturing achievements.
